

Providing construction solutions to the Masonry Industry, Timeless Signs has innovated the first full brick Pre-Fabricated Panel. Integrating pre-cast technology with reinforced construction, these brick panels are fabricated in modular pieces for quick and easy installation. They provide the total solution wherever custom pattern detailing is required, for both residential and commercial applications.

Material

Constructed from full clay or concrete bricks, these panels can be adopted for all types; from Metric Modular to Max sized brick.

Colour

Using the same brick run color as your project, we work with your supplier to ensure consistency in the brick color. Also, use of different colors for extra accent can be integrated.

Sizes

Panel layout can span an entire wall surface, or be specific to parapet banding or small accent paneling. In all cases, the pre-fabricated panels are provided in modular pieces, sized for the application, and identified for quick sequential assembly.

Designs

Pre-Fabricated Brick Panels are designed in various patterns to provide fast, accurate, and efficient on-site construction. We can produce patterns in Herringbone, Soldier Courses, Stack Bond, Basket Weaves, and any other custom masonry detail application.
