

Engraving for Construction

## ADDRESS PLATES

Timeless Signs introduces its new line of custom address plates, designed specifically for post-construction applications. These beautifully engraved signs are created on 'plate-like' building materials. With a large selection of colours and styles, the address plates add a sense of allure and a finished high quality look to your housing project.

### Material

There are three different material types to choose from:

1. Natural **Limestone** finish provides proper blending with other building materials, available in various colours.
2. Synthetic **Porcelain** finish allows for greater colour selection and matching.
3. Polished black **Granite** adds weight and emphasis to the sign.

- Sizes**
- Small (6" x 12" x 3/8")
  - Medium (8" x 16" x 3/8")
  - Large (12" x 24" x 1/2")
  - Custom Cut—just ask.

### Designs & Fonts

- Design & font possibilities are limited only by your imagination.
- All designs are custom applications generated using CNC Technology.
- Designs are approved at a SoftFile stage prior to production.

### Installation

- Performed at the post-construction phase.
- Installed by a Laborer or Homeowner on the surface of the brick, stucco, or siding elevation.
- Affixed to the home using industrial strength adhesive silicon.

### The Benefits of Working With Timeless Signs

- We are a team of experienced professionals equipped to execute your projects in an efficient and timely manner.
- We are dedicated to superior client satisfaction and service.
- We integrate custom logo designs to create brand awareness for your company and building projects.
- You invest in the focal point of the home elevation.
