

Add life to the design of your home or garden by installing a custom engraved Landscape Marker in the heart of your project. Made with Natural Quarry Rocks, we can design and produce unlimited styles of rock displays to suit your needs.

Material

Rock markers can be produced on a wide variety of Natural Rocks from various Quarries across the province.

Two selections of rock types available are:

1. Natural **Limestone** Rock
2. Natural **Granite** Boulder

Sizes

All quarry rocks are custom cut to suit your Landscape design project. We service all sizes, from small garden rocks to large boulder signage.

Designs & Fonts

- Design & font possibilities are limited only by your imagination.
- All designs are custom applications generated using CNC Technology.
- Designs are approved at a SoftFile stage prior to production.

Installation

- Landscape Rocks, due to their shape and size, are very heavy and cumbersome to maneuver.
- For a large project, we recommend delivery and installation be performed by one of our approved Landscape Contractors.
- They will ensure the rock is safely housed into its final position within your Landscape design.

The Benefits of Working With Timeless Signs

- We are a team of experienced professionals equipped to execute your projects in an efficient and timely manner.
- We are dedicated to superior client satisfaction and service.
- We integrate custom logo designs to create brand awareness for your company and building projects.
- You invest in the 'curb appeal' of your landscape project.
